

QUALITY POLICY

K & R Fabrications is committed to implementing and maintaining a management system that will continually improve efficiency and productivity, and ensure that all services provided meet with the requirements of our Customers both internal and external.

The Quality management system will be integrated within all parts of K & R's processes and shall be in accordance with the requirements of ISO 9001:2015

The primary goal of this policy, and associated documentation, is to ensure we fully understand our Customers requirements and to conform to these requirements at all times.

The objectives of this policy are to:

Set measurable objectives and targets to monitor and measure the effectiveness of the Quality Management System.

Establish appropriate performance indicators to ensure these objectives are being met

Provide adequate resources to establish, implement, maintain and continually improve the Quality Management System;

Communicate this policy to all employees through inductions, training and ongoing example in the workplace;

Schedule and carry out audits to verify performance.

Quality is the responsibility of every K & R employee, Subcontractor and Suppliers.

The Quality Management System will be subject to review to ensure the continuing suitability and effectiveness of the system.
